

# WE'RE NURSES IN YOUR CORNER

## ADVOCATE PASSIONATELY

A time of illness is a stressful time for patients and their families. The best-laid plans can go awry, judgment is impaired, and, put simply, you are not at your best when you're sick. To receive the best care possible, you may need somebody on your team that you can trust to help demystify the process and prognosis so you can focus on what matters most. This is what we do at **Health Manager RN**; we act on your behalf, accompany you to appointments and work seamlessly with the other members of your healthcare team, such as your doctors and nurses.

## EDUCATE PATIENTLY

Because each person is unique and there are many paths to wellness, there is no single correct treatment. We meet one-on-one with patients, helping them fully understand their diagnosis, procedures and opportunities. Once we establish a shared understanding of circumstances, we formulate a personal plan and strategy to peacefully address wellness. Our goal is to inform and empower you so that you and your family feel confident that you are making the best possible decisions.

## NAVIGATE PROFESSIONAL

Healthcare providers aspire to deliver the best patient care possible, but are often hindered by a fragmented and restrictive healthcare system. Patients often need someone who can look out for their best interests and help navigate a confusing and complex healthcare system. We ensure patients understand all options, conventional or alternative, and ensure financial responsibilities are clearly understood before moving forward in any direction.
